# **Documentation Overview**

Release 2.1 May 1998

Paradyn Project Computer Sciences Department University of Wisconsin Madison, WI 53706-1685 paradyn@cs.wisc.edu

## MANUALS

#### **Installation Guide**

Describes how to obtain Paradyn and install it, while detailing the minimum operating system and system software version numbers needed for compatibility with this release of Paradyn.

### 🖵 Tutorial

Provides a step-by-step example of the use of Paradyn. It walks you through the main features of starting a program with Paradyn, displaying performance visualizations, and using the Performance Consultant. The tutorial is intended to show many of the common and most useful features, but is not a complete description of Paradyn's features.

## User's Guide

This manual contains a complete description of how to use Paradyn and its comprehensive state-of-the-art functionality.

## DynInstAPI Programmer's Guide

This manual contains a complete description of the DynInstAPI (a standardized interface to Paradyn's dynamic instrumentation) and how to use it.

#### U VisiLib Programmer's Guide

Visilib is the standard API interface for external processes that want to collect performance data from Paradyn. Paradyn performance visualizations (Time Histogram, Bar Chart, Table and 3D Terrain) execute as separate processes, using Visilib as their interface to Paradyn. Visilib provides a simple interface and abstract to the writer of a new performance visualization, with the library handling the details of communicating with Paradyn, processing incoming performance data, providing notifications of changes in the data, and clean-up when Paradyn terminates.

## Developer's Guide

This is intended for those who wish to understand the Paradyn source code—whether to just to browse it or to actually make changes with the intent of rebuilding Paradyn from scratch.

## LibThread Programmer's Guide

Paradyn's internal design is multi-threaded using a custom thread package designed by the Paradyn Project. This thread package uses simple message-passing constructs to unify the actions of waiting for a message from another thread, a message from another UNIX process, a message from a formatted event stream (such as the X window server), a signal, or file I/O. This documents the API to libThread and may be useful if you are working on extending or porting Paradyn, or if you are just looking for a useful thread package. In Paradyn, libThread often is used with our RPC generator, Igen. A manual is not yet available for Igen.

## **TECHNICAL PAPERS**

Following is a bibliography of currently available papers on the technology contained in or related to Paradyn. These papers can be obtained from the Paradyn Project Web home page.

- 1. "The Paradyn Parallel Performance Measurement Tools", Barton P. Miller, Mark D. Callaghan, Jonathan M. Cargille, Jeffrey K. Hollingsworth, R. Bruce Irvin, Karen L. Karavanic, Krishna Kunchithapadam, and Tia Newhall. *IEEE Computer* **28**, 11, (November 1995). Special issue on Parallel and Distributed Processing Tools.
- "An Adaptive Cost Model for Parallel Program Instrumentation" Jeffrey K. Hollingsworth and Barton P. Miller. *EuroPar'96 Conference*, Lyon, France, August 1996. Appears as *LNCS 1123*, Vol.I, pp. 88-97, Springer-Verlag.
- 3. "Dynamic Program Instrumentation for Scalable Performance Tools", Jeffrey K. Hollingsworth, Barton P. Miller, and Jon Cargille. *Scalable High Performance Computing Conference*, Knoxville, May 1994.
- 4. "Dynamic Control of Performance Monitoring on Large Scale Parallel Systems", Jeffrey K. Hollingsworth and Barton P. Miller. *International Conference on Supercomputing*, Tokyo, July 19-23, 1993.
- "The Paradyn Parallel Performance Tools and PVM", Barton P. Miller, Jeffrey K. Hollingsworth, and Mark D. Callaghan. Environments and Tools for Parallel Scientific Computing, J. J. Dongarra and B. Tourancheau, eds., SIAM Press, 1994.
- 6. "Mapping Performance Data for High-Level and Data Views of Parallel Program Performance", R. Bruce Irvin and Barton P. Miller. *International Conference on Supercomputing*, Philadelphia, May 1996.
- "A Performance Tool for High-Level Parallel Programming Languages", R. Bruce Irvin and Barton P. Miller. Programming Environments for Massively Parallel Distributed Systems, K. M. Decker and R. M. Rehmann editors, Birkhauser Verlag, pp. 299-314, 1994.
- 8. "Optimizing Array Distributions in Data-Parallel Programs", Krishna Kunchithapadam and Barton P. Miller. *7th Annual Workshop on Languages and Compilers for Parallel Computing*, Ithaca, NY. August 1994.
- 9. "Integrating a Debugger and Performance Tool for Steering", Krishna Kunchithapadam and Barton P. Miller. *Workshop on Debugging and Performance Tuning for Parallel Computing Systems*. Cape Cod, Massachusetts, USA, October 1994.
- 10. "What to Draw? When to Draw? An Essay on Parallel Program Visualization", Barton P. Miller. *Journal of Parallel and Distributed Computing* **18**, 2 (June 1993).
- 11. "Binary Wrapping: A Technique for Instrumenting Object Code", Jon Cargille and Barton P. Miller. *SIGPLAN Notices* **27**, 6 (June 1992).
- 12. "Finding Bottlenecks in Large-scale Parallel Programs", Jeffrey K. Hollingsworth, August 1994. University of Wisconsin-Madison Computer Sciences Department Technical Report #1243 (Ph.D. Thesis).
- 13. "Performance Measurement Tools for High-Level Parallel Programming Languages", R. Bruce Irvin, October 1995. University of Wisconsin-Madison Computer Science Department Technical Report #1292 (Ph.D. Thesis).
- 14. "MDL: A Language and Compiler for Dynamic Program Instrumentation", Jeffrey K. Hollingsworth, Barton P. Miller, Marcelo J. R. Goncalves, Oscar Naim, Zhichen Xu and Ling Zheng. *PACT'97*, San Francisco, California, USA. November, 1997.

## **CONTACTING THE PARADYN DEVELOPERS**

There are various ways to get in touch with the Paradyn developers. We are happy to answers questions and appreciate feedback.

e-mail: paradyn@cs.wisc.edu

This is our project e-mail address. Use this address for technical questions or requests.

Web: http://www.cs.wisc.edu/~paradyn

This is our home page. From this page, you can find out how to get a binary or source version of Paradyn. You can also get updates and news on the current release of Paradyn.

FTP: ftp://grilled.cs.wisc.edu/paradyn/

This is our ftp site. In the "paradyn" directory, you will find subdirectories containing the binary and source versions of the Paradyn release. Make sure to look at the README files!

FAX: +1-608-262-9777

Postal: Paradyn Project Computer Sciences Department University of Wisconsin 1210 W. Dayton Street Madison, WI 53706-1685 USA
