About This Manual vii
Customer Support xi

Chapter 1 Introduction **1**

1.3 Overview of CM/AVS 1

1.4 The CM/AVS Package 2

Chapter 2 Using CM/AVS Modules **5**

2.1 The CM/AVS Modules 5

2.2 Using CM/AVS Modules in a Network 6

2.3 Preparing to Run Remote CM/AVS Modules 7

2.4 Running a Remote CM/AVS Module — Tutorial 8

2.5 An Important Note about Performance 12

2.6 Running CM/AVS Modules Locally 13

2.7 Cleaning Up 14

Chapter 3 Writing CM/AVS Modules **15**

3.1 The Field Type 15

3.2 The Parallel Field Type 16
    3.2.1 Declaring a Parallel Field 17
    3.2.2 Passing a Parallel Field 17

3.3 Using AVS Field Routines on Parallel Fields 17

3.4 Allocating Parallel Fields 18
    3.4.1 Parallel Input Ports 18
    3.4.2 Explicit Allocation 19

3.5 Accessing Field Data and Coordinates 20
    3.5.1 Access Routines 20
    3.5.2 Primitive Data Types 22
    3.5.3 Data Array Layout 23

Copyright © 1993 Thinking Machines Corporation

3.5.4 Coordinate Array Layout 23
3.5.5 Declaring the Arrays 23
3.6 Luminance Module Example 24
3.6.1 Luminance Module Code 24
3.7 The CM/AVS Header Files 27
3.8 The CM/AVS Libraries 27
3.9 Compiling a Module 28
3.10 Debugging a Module 29
3.11 Getting Help 29
3.12 Multiple-Module Binaries 30

Appendix A CM/AVS Routines 31
A.1 **CMAVScorout_init** 32
A.2 **CMAVSdata_alloc** 32
A.3 **CMAVSfield_alloc** 33
A.4 **CMAVSfield_alloc_data_shape** 34
A.5 **CMAVSfield_alloc_points_shape** 35
A.6 **CMAVSfield_copy_points** 35
A.7 **CMAVSfield_data_get** 36
A.8 **CMAVSfield_points_get** 37
A.9 **CMAVSfield_reset_minmax** 38
A.10 **CMAVSis_field_on_CM** 39

Appendix B CM/AVS Modules (man pages) 41
antialias cm 43
clamp cm 45
color range cm 48
colorizer cm 51
combine scalars cm 54
compare field cm 57
compute gradient cm 60
contrast cm 64
downsize cm 67

Copyright © 1993 Thinking Machines Corporation

extract scalar cm 70
fft cm 72
field math cm 74
field to byte cm 78
field to double cm 80
field to float cm 82
field to int cm 84
luminance cm 86
orthogonal slicer cm 89
threshold cm 93

Appendix C **Unsupported Programs and Modules** **95**
avstoppm 97
ppmtoavs 98
field to polygons 99
field to spheres 101

Index **105**
